Our chemical footprint commitment

ASSESSMENT OBJECT

Selected Argentine companies, products and industrial processes across priority value chains.

CHEMICAL FOOTPRINT ELEMENTS

Chemical usage → emissions → human toxicity and ecotoxicity impacts, where data permit.

ASSESSMENT SCOPE

Start with direct operations (Scope 1); expand to supply chains (Scope 2) and the full life cycle (Scope 3) as capacity allows.

Planned pilot engagement: approximately 10–12 Argentine companies (subject to selection and institutional confirmation)

Turning evidence into better decisions

IDENTIFY PRIORITIES

Map chemicals in products and processes; recognize substance, emission and toxicity hotspots.

INFORM ACTION

Support safer chemical substitution, process and product redesign, and assessment of alternatives.

STRENGTHEN CAPACITY

Build industry and institutional expertise; contribute lessons, examples and data gaps to GFC pilot guidance.

Our aim: practical, science-based decisions that reduce impacts from chemicals across value chains

Mobilizing INTI technical expertise

CRBAS / INTI / ARGENTINA ROLE

Engage chemical companies, associations and chambers and their technical teams.

Support training, data organization and pilot implementation.

Connect national experience with the GFC and UNEP international guidance processes.

INTI TECHNICAL CENTRES

Textiles • Furniture • Cosmetics

Chemistry & Environment • Plastics

Construction

Cross-sector collaboration and coordination meeting on substances, processes and waste management: **13 November 2026.**

RELEVANT INDUSTRY ASSOCIATIONS & CHAMBERS - STAKEHOLDER OUTREACH

Textile & apparel: FITA · CARFA · AAQCT · CIAI · Pro Tejer

Chemicals: CIQyP | Other sectors: furniture, construction, cosmetics

NEXT MILESTONE | 16 DECEMBER 2026

First meeting with Argentine industry associations and companies; presentation of key conclusions from the GFC IC1

CRBAS
Centro Regional Basilea para América del Sur
